

gas to power. 285 - 1,000 kW.

The answer to your Power-Only Generation needs.

natural gas.

A variety of system options can provide you with high quality on-site power generation, while maximizing your savings opportunity. These systems are available for all sectors, including manufacturing, remote areas, data centers, greenhouses, etc. 2G now has a line up of engines from 285 kW to 1,000 kW. Peaker options available from 700 kW to 1,250 kW.

continuous operation

	Electrical Output	Electrical Efficiency
avus 500 plus	550 kW	40.6 %
avus 1000 plus	1,000 kW	42.3 %
patruus 285	285 kW	37.0 %
agenitor 408	360 kW	40.9 %

peaker (max 300 hrs/yr)

avus 500 plus	700 kW	40.2 %
avus 1000 plus	1,250 kW	41.4 %

possible applications.

Office and Administration Buildings

Shopping Centers

Sports and Rec Facilities

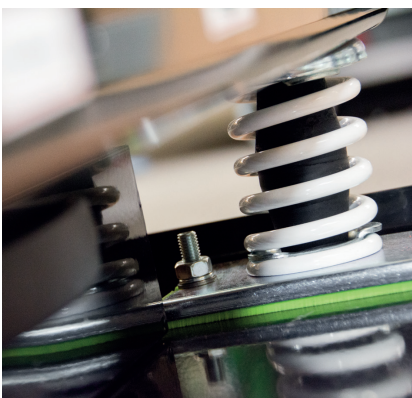

Hotels

Schools and Universities

Combining 2G Engineering and Manufacturing Excellence in a Solution that is Lean and Efficient.
